

PONNY KIDS AND THEIR PROJECTS

December 2013

Ecology – Christmas Decorations

As a part of our Eco project we had to make some decorations of course. Because it's Christmas time! And as it is an Eco project they should be eco friendly as well.

It was just ordinary cone first...

But Tigers started the colouring...

They used colourful beads...

It wasn't easy to stick them on... It was fun though....

We did a good job!

The cones that we found around preschool were given to the Tigers first. All they had to do was colour the cones green. They were excited because they realised that cone painted green looks like a real coniferous tree. All they had to do next was stick beads on the „branches“ as a decorations (bulbs) and put a small fluffy ball on the top. Here we go! The Christmas decorations/little Christmas trees are done. Good job!
