

PONNY KIDS AND THEIR PROJECTS

November 2103

Ecology – Bird Feeders

This eco lesson was dedicated to animals, specifically to birds. As a part of our support to the nature we made a some bird feeders to help the birds.

Tigers had to place the lace first...

They decorated the tube...

They used peanut butter...

And seeds for birds...

Tigers were excited...

Now it is hanging in the garden.

In the beginning of the lesson we talked about animals in general especially about birds. What they eat etc. Then we started to make the bird feeders from paper roll tube. Each Tiger made his own one.

We used peanut butter first and spreaded it on the tube. We rolled it in the seeds afterwards and decorated it with paper. At the end the Tigers went out to hang them on the trees in the garden. We are going to watch the bird feeders regularly. Tigers were excited and surprised that it is so easy to make this kind of things. And they learned something new as well, for example what do birds eat.
