

PONNY KIDS AND THEIR PROJECTS

November 2103

Ecology – Videos

Today Tigers had more relaxing kind of lesson. They watched videos about ecology. Specifically about pollution and waste sorting etc. And Tigers really liked it of course.

Tigers were fascinated...

They like watching videos...

And these were really interesting.

This day was the sleepover day so it was the right time to relax a bit and watch some videos. Although it is our project and we need to follow the schedule so the videos need to be about ecology. There are videos on youtube explaining in very simple and funny way how it works with water circulation, air pollution, water pollution, waste sorting etc.

Tigers really liked the videos because they were quite understandable for them and they excited to learn something new, something they did not know before but what is everywhere around them.
