

PONNY KIDS AND THEIR PROJECTS

September 2013

Ecology – Introduction

This year we are going to work on project about Ecology. This project we started with introductory lesson to explain what ecology actually is.

They signed the contract....

Coloured the recycle sign...

then they stuck the pictures on bins

In the first lesson of ECO project the concept of ecology was introduced in the simplest way that is possible. Children were given some examples of recycling to understand the point of this process. They did some colouring connected with the topic (recycle symbol, contract with planet) and finally they placed the recycle signs and sorting pictures on new dustbins.

Tigers really enjoyed this half an hour especially the part when they could stick the signs on the dustbins - they felt like everyone can see their piece of work. And they learned a lot new as well.
