

PONNY KIDS AND THEIR PROJECTS

October 2103

Ecology – Treasure

The topic of this ECO lesson was „Treasure“. Tigers were excited about this topic but they did not know what is going to happen.

Some things were given to Tigers...

We talked about them a bit...

We wrote a list of the items...

They went out to dig a hole...

And placed the things inside...

The treasure was not really a treasure. Tigers got some items from different kinds of material (screw, plastic cup, leaf, cone, glass, skin from pomelo, pear...). We talked about the things – where we can get them, what they are made from etc. We wrote a list of the items and we put it to safe place because we are going to need it in the future. During putting things together into bag children were asked the main question: What is going to happen with the things after few months in soil?

At the end of the lesson they were allowed to go out, dig a hole in the garden and put the treasure inside. They were excited. They ask every second day when they can dig the treasure out. It will také few months...
