

# PONNY KIDS AND THEIR PROJECTS

September 2103

## Life in Europe – Belgium

First lesson of the project Life in Europe was partly about revision of last year project and mainly about the first country of twenty european countries Tigers are going to learn about - Belgium.

We started with flags in general...

Tigers coloured the flag and map...

They tried to play saxophone...

And we talked about Belgian icons...

Children got a pictorial map of Belgium and they were supposed to name the things they can see in the pictures so we could talk about them. They liked it because some of the pictures were a bit funny for them. They got a worksheet with flag and map as well so they could colour it.

Playing the saxophone (it was invented in Belgium) was great for them, they had a lot fun of it. They enjoy also the fact that they already have some notion about the countries so it is not so difficult for them.
